

Environmental Policy

Responsible environmental management plays a significant part in securing the future of the mining and resource industries.

NTC Contracting considers its performance in the area of environmental management as one of the factors in its success to date as an earth-moving contractor in the mining and civil construction industries.

NTC Contracting will continue to improve environmental management standards by:

- Complying with relevant environmental legal, project and other requirements as a minimum, and exceeding these commitments where practicable;
- Assessing environmental risks and implementing appropriate control measures prior to the commencement of each project;
- The establishment, implementation and maintenance of our Environmental Management Systems in accordance with AS/NZS ISO 14001;
- Setting, meeting and reviewing objectives and targets to reduce environmental risks;
- Minimising adverse environmental impacts through the use of integrated management procedures and planning;
- Preventing pollution, reducing waste and where practicable committing to waste recovery and recycling as opposed to disposal;
- Communicating environmental requirements to all employees and subcontractors;
- Ensuring that environmental management considerations are fully evaluated, costed and detailed in tender bid preparation;
- Reviewing environmental performance and identifying opportunities for improvement; and
- Encouraging and seeking the input of all employees to into our environmental plans.
